# ¿Qué es FeathersJS?

# Compatibilidad

# Real-time

# Hooks

```
module.exports = {  
  before: {  
    all: [],  
  
    find: [authenticate('jwt')],  
  
    get: [authenticate('jwt')],  
  
    create: [before_initialize(), hashPassword()],  
  
    patch: [...restrict, hashPassword()],  
  
    remove: disallow(),  
  },  
  
  after: {  
    all: [],  
  
    create: [after_initialize()],  
  },  
}
```

# Cli

- > feathers generate app
- > feathers generate service

```
▼ src
  ▼ hooks
    JS logger.js
  ▼ middleware
    JS index.js
  ▼ services
    ▼ demo
      JS demo.filters.js
      JS demo.hooks.js
      JS demo.service.js
      JS index.js
    JS app.hooks.js
    JS app.js
    JS index.js
```
